

Please be advised that I am a current subscriber to XM Satellite Radio. I use extensively its traffic and weather channels for my daily commute in the Los Angeles area. In addition to the traffic and weather channels I use many of the other commercial free channels for which I am willing to pay for willingly. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I am willing to pay a subscription to, similar to cable TV such as HBO and Cinemax.
